Special Publications Systems

USAF INTELLIGENCE (USAFINTEL) SPECIALIZED PUBLICATIONS

This regulation authorizes the Assistant Chief of Staff, Intelligence (ACS/I) HQ USAF, to publish specialized US Air Force Intelligence (USAFINTEL) publications. It also explains how these publications are indexed and distributed. This regulation applies to all Air Force activities. It applies to US Air Force Reserve and Air National Guard units and members.

1. Use of USAFINTEL Publications. These publications prescribe aerospace intelligence and security policies and procedures which are not included in standard Air Force publications because of their special sensitivity. Publications in the 200 series are equally binding as standard Air Force regulations whereas 400 and 500 series publications are for informational guidance only. Each publication is numbered in sequence (for example, USAFINTEL 201-1, 201-2, etc). AFR 5-3, Standard Intelligence Publications System, explains standard intelligence publications, including USAF Intelligence and Defense Intelligence Agency publications and Joint Service Intelligence Manuals.

2. USAFINTEL Publication Policy. USAFINTEL publications:

- a. Prescribe forms and reports dealing with Sensitive Compartmented Information (SCI) and associated intelligence and security matters only.
- b. May not change a standard Air Force publication.

3. Format and Authentication. USAFINTEL publications must conform to the publications format in AFR 5-1, Air Force Publications Management Program. Each USAFINTEL publication also uses the heading "DEPARTMENT OF THE AIR FORCE," the command line, "BY ORDER OF THE SECRETARY OF THE AIR FORCE," and the names and titles of the Chief of Staff and Director of Administration, USAF.

4. Review and Approval. Each ACS/I, HQ USAF and Air Force Intelligence Service (AFIS)

office of primary responsibility (OPR) may approve a USAFINTEL publication. Responsibilities for ensuring compliance with AFR 5-1 and AFR 5-8, Preparing Air Force Publications, standards governing need, format, clarity, coherence, continuity, syntax, propriety are delegated to:

- a. The Assistant for Security and Communications Management (HQ USAF/INS) for USAFINTEL publications dealing with and distributed through the Air Force SCI security management system (see AFR 200-7, Sensitive Compartmented Information (SCI) Security System).
- b. AFIS/DA for USAFINTEL publications distributed through systems other than those described in a above.

5. Printing and Distributing USAFINTEL Publications:

- a. HQ USAF/INS requests printing, distributes, stocks, and maintains the case files for publications produced under paragraph 4a.
- b. AFIS/DA requests printing and initially distributes publications produced under paragraph 4b. The OPR stocks and maintains the case file for these publications.

6. How To Obtain Copies of USAFINTEL Publications After Initial Distribution. Send fully justified requests for USAFINTEL publications processed by:

- a. HQ USAF/INS through the parent major command senior intelligence officer (SIO) to HQ USAF/INSC, except HQ Electronic Security Command (ESC) activities which send their requests to HQ ESC/DAPD.
- b. AFIS/DA through channels to the appropriate ACS/I or AFIS OPR.

7. Where USAFINTEL Publications Are Indexed. USAFINTEL publications are indexed in AFR 0-15, Defense Intelligence Agency (DIA) and Specialized USAF Intelligence Publications.

Supersedes AFR 8-3, 29 May 1979. (See signature page for summary of changes.)

No. of Printed Pages: 2

OPR: INSCO (Mr R. D. Semmel)

Approved by: Lt Col Raymond E. Abel

Director of Administration

SUMMARY OF CHANGES

This revision redefines the use of USAFINTEL publications (para 1); changes procedures for obtaining copies of them after initial distribution (para 6); and gives title to mentioned AFRs, and contains editorial and format changes.
